

For Immediate Release, February 11, 2010

TPI (Thomas Products LLC.)

TPI, a company servicing the micro-ingredient and premix needs for the western United States located in Madera, CA has recently earned the American Feed Industry Association (AFIA) Safe Feed Safe Food Certification and joined AFIA's mission of "insuring continuous improvement in the delivery of a safe and wholesome feed supply". TPI's quality assurance manager, Eduardo Flores stated, "I am proud to say that we have met all of their (AFIA's) requirements and are now a SAFE FEED / SAFE FOOD certified facility." TPI's general manager John Peters, Ph.D. stated, "This is only one step we as a company have taken as part of our commitment to quality. The continued focus on relevant merits of product quality and safety in our food supply will be an ongoing priority." In addition to being Safe Feed and Safe Food Certified, TPI announced that as of January 1, 2010, they have the capability of meeting premixing needs that require a medication and ionophore free manufacturing facility. The confidence to maintain this status is through TPI's employees, plant automation, and a total inventory tracking system. For more information, please contact TPI at 800-666-6102.
